

I support Continental Airlines petition to continue providing free wireless service to its customers at Logan and other airports. I am able to connect quickly and simply, wherever I fly with Continental. I believe the FCC should uphold the right of citizens to use the wireless service of their choice. The time has come to quit granting and supporting commercial and governmental monopolies for essential public services (e.g., schools, telecommunications, internet access, internet video, etc.) when other options are available and economical to the public.
